

Eleventh addenda to criticism of the current science in the world

Pejman Malekinejad

Department of Materials Science and Engineering, Kerman Graduate University of Technology, Iran

Abstract

In this article, causes and remedial actions for my schizophrenia were discussed. The effects of my previous papers [3 to 15] on my schizophrenia were discussed here in this paper. Also the effect of marriage and entertainments on my schizophrenia were mentioned. Furthermore, some scientific problems of Iran were mentioned. In addition, it was deduced that the only way for the scientific advancement of Iran is to make Iran a state of USA.

Keywords: Schizophrenia, depressive realism, entertainments, marriage, jealousy, olopatadine

Introduction

Voice of America (VOA Persian) has issued an article ^[1] that is in the same line with this paper. In fact, that article from VOA Persian confirms this paper. Also Eminent Crown Prince of Iran, Reza Pahlavi has a saying from Atamalek Joveini about Iran Islamic Regime as “They came and dug and burned and killed and took away and went” ^[2] which approves this paper.

Discussion

I have previously said that a large part of discovered science is kept secret and is not in public access [3 to 15]. This fact was first given by my university professor Mohammad Jamialahmadi whose resume can be found in internet ^[16]. He was known as the scientific pole of the university and repeated this fact many times and for all the students in the classroom but no one understood it because it was very heavy. This fact is exactly mentioned in “Encyclopedia of World Problems and Human Potential ^[17]” as “A considerable amount of scientific research is conducted in institutes or under contracts which preclude dissemination of the results to other than a select group ^[18]”. Therefore, we can see that Iran cannot solve many scientific problems as superpowers.

I have previously written 13 articles in which I said that I will not become anything in the science, I have no intelligence and I will not become anything in general [3 to 15]. Therefore, according to the principles of Depressive Realism, I must become happy. But the concepts mentioned in those articles was very heavy such that nobody understood them. So I decided to show my free entertainments to the public which is available in my website ^[19]. When somebody wastes time on entertainments, then he will have no time for studying, work and other activities. Therefore, according to the principles of DEPRESSIVE REALISM, he must get happy. Also I want to marry a girl and I want to have 20 children and I love my family. When somebody marries, then he will waste time on family and growing children. Therefore, he has no time for studying, work and other activities. So according to the principles of DEPRESSIVE REALISM, he must get happy. The people just understand entertainments and marriage and they do not understand my previous papers [3 to 15]. Marriage and entertainments work in the same way in

DEPRESSIVE REALISM and both of them make the person happy. There are a number of Iranian songs which describe the love of father to his children. An example is the song of “Pesaram” from Mr. Dariush Eghbali which is available in YouTube ^[20]. Another example is the song of “Pesaram” from Mr. Hassan Shamaizadeh which is available in YouTube ^[21]. The other example is the song of “Ye Dokhtar Daram” from Mr. Hassan Shamaizadeh which is available in YouTube ^[22]. Also there is another song from Mrs. Googoosh as “Ma Beh Ham Mohtajim” about DEPRESSIVE REALISM which says “We need each other like the crazy who needs sleep”. It is available in YouTube ^[23]. As the illustration, when somebody marries, then he will get busy with family and growing children and has no time for studying, work and other activities and therefore according to the principles of DEPRESSIVE REALISM, he gets happy. In the same way, as a mentally disordered person sleeps, then he has no time for studying, work and other activities and therefore according to the principles of DEPRESSIVE REALISM, he gets happy. It should be noted that psychiatry drugs are hypnotic. As it is mentioned in the body of this manuscript and number 28 reference of this paper, this article will be my last article and my last scientific and political activity. Political activity against Iran regime is dangerous and will result in jail or death and if I want to escape these, then I must say that I am crazy which is not good. But I will have my own free entertainments that are nonscientific and non-political which are explained in number 19 reference of this paper. Also I will marry and I will waste my time by family and growing children. When somebody wastes time on family and these entertainments, then he will have no time for studying, work and other activities and therefore according to the principles of DEPRESSIVE REALISM, he will get happy. One other reason why I will not write any more articles is that I have nothing more than my last articles (“Criticism of the Current Science in the World” and “its 13 Addenda”) to say. The reason why I became political is psychological. The people made me political. In this way I must say that I am crazy when encountering the agents of Islamic Republic of Iran regime. Many people tried to put me against Iran regime. I have said in above articles that universities

are waste of time. Imam Khomeini have also reached to that and accordingly he ordered the Iran universities to be closed in Iran Islamic Revolution in 1979. Why nobody objected and opposed him? Also I have mentioned some scientific problems of Iran which are exactly mentioned in the official websites of Iran Ministry of Industry, Mine and Trade, Iran Ministry of Petroleum and its sub companies. If you do not want Iran scientific problems to be revealed, then block those official websites. Regime of Iran is based on the principles of democracy which means the rule of the majority. I respect the Iran Islamic Regime as the choice of the majority of Iranians since I act according to the principles of democracy. Everything in my life will result in schizophrenia in different ways. Also Hollywood is full of movies about Depressive Realism. At one end, there are movies like “The Silence of the Lambs, 1991”, “Rain Man, 1988”, “A Beautiful Mind, 2001”, “The Iron Lady, 2011” and etc. In these movies intelligent people got mental disorders according to the principles of Depressive Realism. The message of great movie of “The Silence of the Lambs, 1991” is that if you do not understand anything like a lamb, then you will be slaughtered. At the other end, there are animations like “Droopy, 1943” which show that application of the principles of Depressive Realism causes the society not to advance. In summary in this animation, Droopy dog is in competition with other larger, more intelligent, more active and stronger dogs and in all these competitions, the droopy dog wins according to the principles of Depressive Realism. Therefore, their society will never advance and they will remain animal forever and will never become humans. Anyway I laugh very much when watching this animation. Droopy is an animated character from the golden age of American animation. The very iconic quote of Droopy Dog is “I’M SO HAPPY” which is clear in Figure 1.

Fig 1: Droopy Dog with its iconic quote.

People think that I am the world mastermind and therefore all the people try to make mental disorder for me. I want to tell that I am not the mastermind of the world and I will not become so. Therefore, according to the principles of Depressive Realism, I must get happy.

Fig. 2 is from Babylon Picture Dictionary for crazy. He spins his finger around his ear to say that you are crazy. Also, he mocks everybody. He escapes since the people make him crazy. He uses magic to produce illusions and hallucinations. Babylon Picture Dictionary is a valid, reputable and top international dictionary. Now I suppose that you could send me to madhouse. But the world understands that you, yourself are crazy. The following photo from Babylon Picture Dictionary shows this fact very good. According to the principles of DEPRESSIVE REALISM, the reason why intelligent people catch mental disorders is that all the people are jealous of such minds and therefore try to make a mental disorder for those intelligent persons and try to destroy those minds. This is because people think that everything is brain and science and they are the most important things. The people think that if they have brain and science, then they will reach everything. This is completely wrong in Iran since the most important thing is politics in Iran because money, power and other benefits of political activities is extremely higher than any other activities in Iran. For example, as I have previously mentioned ^[24], the worth of Khamenei as Iran leader (200 Billion USD) is approximately twice more than the worth of richest person in the world as Mr. Jeff Bezos (116.9 Billion USD) who is known as the founder of AMAZON as world giant technology company ^[25]. Furthermore, Khamenei has control of Iran military and for example guns, missiles, war aircrafts, bombs and so on which Mr. Jeff Bezos does not have them. People cannot withstand and bear that a brain works so well and try to make a mental disorder for that intelligent person. It is to say that the intelligent people are mentally ill and in this way they appear crazy. These mental disorders are made to show that intelligent people seem crazy. People make mental disorders for intelligent persons to say that do not be honored of your brain since the psychological facts show that you have a mental disorder. But all the world knows that those who make these mental disorders are crazy themselves. People want to make psychiatric and medical documents, dossiers and records for that genius to show that he is mentally ill and this is why they send him to psychiatrist. The age of such frauds is over. The following photo from BABYLON Picture Dictionary shows this fact very good. Beside political reasons, one reason why I have written this article and my previous papers [3 to 15] was to say that I will not become anything in the science, I have no intelligence and I will not become anything in general. This is because a large part of discovered science is kept secret and is not in my and public access ^[18]. Therefore, do not be jealous of me, my science and my brain. So, I must be happy according to the principles of DEPRESSIVE REALISM. Anyway the people say that I have schizophrenia and my manuscripts of psychiatrist are in my website ^[26, 27]. In Farsi crazy means giant. But I am not giant at all and I have illustrated this fact here in this paper and my previous papers [3 to 15]. Being giant results in jealousy of others and causes mental disorders. In this world that everything is scientific, intelligent people are considered as giant people. 15 years ago my brother said to me that people want to make medical and psychiatric documents, dossiers and record for you and that you should not continue education since your schizophrenia will worsen. My brother is a physician and now is an orthopedist. Now I understand him. I mean that there are greater psychiatrists than me in the world. Since everybody wants to make mental disorder for me, then it can be concluded that I am the mastermind of the

world. But do not be jealous of my science since I will marry and I will have children and also I have my free entertainments ^[19]. Crazy people make mental disorders for people since they are jealous of others' science. But do not be jealous of my mind, my science and me since I am nothing. I have published 13 articles in international journals [3 to 15] in which in summary I have said

that I will not become anything in the science, I have no intelligence and I will not become anything in general. Therefore, according to principles of DEPRESSIVE REALISM, I must always be happy. So do not get crazy and consequently make me happy. The following photo is Babylon Picture Dictionary for Crazy.

Fig 2: Babylon picture dictionary for crazy.

According to the principles of Depressive Realism, sadder people are wiser. On the other hand, crazy people are happy. This happiness is not free and it has a cost. The cost is that one should always remain crazy. I will continue writing these series of papers titled "Criticism of the Current Science in the World" and "Its 11 Addenda" [3 to 15] forever since it is good for my mental health and I have said this in my website and other profiles like Facebook, Researchgate, Academia and etc.

I am a sick and very poor man. I requested Dear Eminent Mr. President of USA Donald J. Trump, Her Highness Mrs. Ivanka Trump and U.S. VIRTUAL EMBASSY IRAN to send me money. I know that they control many charity organizations worldwide. I need a monthly basic income to survive. I have created a WebMoney (WebMoney is an online payment settlement system) account for financial aid to receive. The purse number is Z291871883734 and is in my name. Financial aid from any other sources are also greatly appreciated. For financial helps from Iran, my card number in TEJARAT BANK is 5859831150971751. Also after 2020 USA presidential elections I wrote a message to FACEBOOK pages of Dear Eminent Mr. President of USA Donald J. Trump and Her Highness Mrs. Ivanka Trump the content of which is revealed to public ^[28].

Conclusion

The only way that I strongly suggest for the scientific and economic advancement and development of Iran in all fields (including politics) is to make, regard and announce Iran as a state of USA (United States of America) officially and politically (and totally). I.e. Iran should make and regard itself as a state of USA (United States of America) politically (and totally). I have heard that this idea was first suggested by His Majesty Mohammad Reza Shah Pahlavi for Iran. I have created a petition in internet ^[29] for everybody to sign it and to make Iran a state of USA. So please sign this petition.
